

Love Maths Facts
Reception Autumn 1

Count to five and back to zero

Count objects to 5 touching each object as the corresponding number is said

Order the numbers correctly

Know one more than and one less/fewer within 5:

1 more than 0 is 1	1 fewer than 5 is 4
1 more than 1 is 2	1 fewer than 4 is 3
1 more than 2 is 3	1 fewer than 3 is 2
1 more than 3 is 4	1 fewer than 2 is 1
1 more than 4 is 5	1 fewer than 1 is 0

Read the numbers up to 5 when written in words:

Zero, one, two, three, four, five

Write the numerals correctly starting at the top-

0 1 2 3 4 5

Add/subtract objects within 5-

e.g. $2+1=3$, $3+5=8$, $5-4=1$, etc

Top Tips for Home Learning

Do little and often

Rhyming songs and finger rhymes such as `Five in the Bed` are good to help learn counting skills.

If they can count back from 5 to zero, can they count on from 3 and stop at 5? Count back from 4 and stop at 0? (You will find many rhyming songs and finger rhymes-with actions-on youtube)

Have a number hunt around your house/in the street and shops/on car number plates-to find numbers and say correctly

You could write the numbers out to start with or use a pack of cards. Give your child cards to 5 for them to put in order and then use to support counting forwards and backwards

To support your child in working out one more or one less you could count, pausing at the number they need.

For example,

To work out 1 less than 6, you could say

10,9,8,7, 6, ?

Write numbers on the floor/cards to put on the floor and jump 1 more/less than a number.

Play lots of dice/domino games with your children so that they become familiar with the numbers in spot form.

(There are examples of apps to use on the reception page on the Combe Martin website.)
