

Off by Heart Facts
Year 4 Spring 2

Recap all of the times tables to 12 x 12

Know and derive facts related to their tables.

I know the effect of dividing by 10 and 100 and can talk about each digit using ones, tenths, hundredths
e.g $13 \div 10 = 1.3$

I know other fractions that are the same as
 $\frac{1}{4}$ $\frac{1}{2}$ $\frac{3}{4}$

Relate tenths to decimals
 $0.1 = \frac{1}{10}$ $0.2 = \frac{2}{10}$ etc.

I know:

1 minute = 60 seconds

1 hour = 60 minutes

1 day = 24 hours

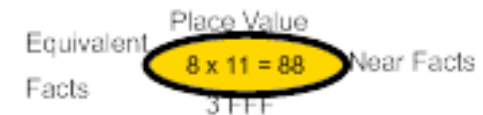

1 week = 7 days

1 year = 365 days = 12 months

Top Tips for Home Learning

Do little and often

If you know $8 \times 11 = 88$ what else do you know?

What is $\frac{1}{4}$ of £10.00?

A packet of mints has 30 sweets in it, I give $\frac{1}{2}$ away, how many do I have left?

Catch 'n' count.

Count in patterns of 6,7,9,25,1000.
